DETAILED ACTION

Response to Amendment

This Office Action is in response to the applicant's After Final Amendment filed on March 30, 2006. All prior objections and rejections are withdrawn in view of the appropriate amendments to place the claims in condition for allowance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Soldner on April 11, 2006.

The application has been amended as follows:

Cancel claims 47-51.

Allowable Subject Matter

Claims 1, 3-26, and 28-46 are allowed. Claims 16-17, 19, 21-22, 38-39, 41, and 43-44, previously withdrawn as being directed to a nonelected species, are rejoined since they now depend from allowable independent claim 1 or claim 25.

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 1, the prior art does not disclose or suggest a connector ring facilitating coupling of the virtual electrode assembly to the catheter body distal end. Regarding independent claim 7, the prior art does not disclose or suggest an outer cap as claimed that is formed of ceramic. Regarding independent claim 15, the prior art does not disclose or suggest an outer cap as claimed, wherein a maximum distance between the exterior surface of the electrode and the cap inner surface is between approximately 0.003 inch and approximately 0.005 inch. Regarding independent claim 25, the prior art does not disclose or suggest a coupling means comprising on or more detents on the outer cap engaging the one or more spacers of the inner electrode.
